REASONS WHY COMPANIES LOVE

CROSSWARE MAIL SIGNATURE

YOU SET THE RULES

With the ability to create and set powerful rules, every part of your company signature can be controlled – use rules to specify when, where and how you want to display everything from ad banners to phone numbers.

ON EVERY DEVICE, AND CLIENT

Your signature will appear on every email, not matter what device or client you're sending from. No individual device set up is required and consistency is maintained. Easy!

CENTRALLY CONTROLLED

You can stop chasing up your colleagues about manually changing their outdated signature! Centrally control company signatures within our powerful signature editor.

ALWAYS SEE YOUR IMAGES

Signature images – logos, ad banners and graphics, are displayed inline. This means you'll always see your images in the email, not as annoying attachments stacked at the end of your conversation.
